

FULL SCALE

CLIENT CASE STUDIES

Full Scale has provided software and development solutions for a broad scope of client needs. The following studies provide a close examination of those solutions.

Healthy Hip Hop is transforming a generation through hip-hop culture, education and cutting-edge technology.

CLIENT : H3 ENTERPRISES LLC

CONTENT DELIVERY SYSTEM AND MOBILE APP PLATFORM

Full Scale has provided H3 a total team solution. This allows H3 to concentrate on product development without gearing down on developing features to the already successful H3 online platform for education and mobile application.

- Designed cross-platform mobile applications on iOS and Android devices that deliver quality content, design, and user experience.
- Built a fully-functional companion web application delivering relevant functions and user workflows such as account management and subscription.
- Developed a web architecture design that is scalable and flexible for cross-platform functions using Node, Express, & Amazon Web Services.
- Incorporated fun and audience-appropriate features such as Avatar Animations and Camera Face Filters with the use of Spine Animation and deepAR SDK, respectively.

Our Guided Development process helps improve direct, transparent communication between teams.

FULL SCALE

Golf doesn't have to be hard. It should be fun. You know what's fun? Shooting par. Making your old course new again. More fist pumping, less bogey-fueled frustration.

CLIENT : PARPOINTS GOLF

CROSS-COMPATIBLE MOBILE APPLICATION

Full Scale has helped to develop the ParPoints Mobile Application from the ground-floor. As we prepare to launch the application to both iOS and Android stores, ParPoints Leadership is able to focus on building the business while we build the software.

- Fully developed a cross-compatible mobile platform leveraging our knowledge and experience in iOS/Android Development as well as native build tools including XCode, Gradle, and Firebase.
- Use of REST APIs
- Actively working with third-party dependencies and debugging dependency conflicts.

WHAT IS GUIDED DEVELOPMENT?

Our Guided Development process helps improve direct, transparent communication between teams.

CLIENT : FLYWHEEL

WEB APPLICATION DEVELOPMENT, QUALITY ASSURANCE

Full Scale is an integral part of successfully built web applications to enhance the overall customer experience for Flywheel’s client. Our team rolled into Flywheel’s development organization with little disruption to add value quickly.

- Development and Quality Assurance across multiple software products
- Successful build of new applications and enhancing existing software utilizing model-view-viewmodel JavaScript Framework, Ruby on Rails, Vue.js, and PostgreSQL database.
- Applied Object-Oriented Programming Principles and design patterns
- Use of Test-Driven development software practice for enhanced program design and higher code quality, within an Agile environment.
